

Project Description

Enabling works for a new housing development.

Client: Barratt Homes

Works Package: Bulk Earthworks, Crushing, Impact Compaction, Soil Modification, Remediation

Project Numbers:

- Bulk Earthworks – 70,000m³

Challenges & GDL Solutions

- Proximity of existing neighbourhood
 - Strict control of noise, vibration, traffic and general site disturbance
- Low levels of contamination within made ground
 - Appropriate ground remediation and validation measures

Client Benefits

- Simplified foundation design enabling more efficient construction and reduced programme risk.
- Reduced excavation, export, and import of materials, delivering cost savings, lower environmental impact and improved site efficiency and sustainability.
