

Project Description

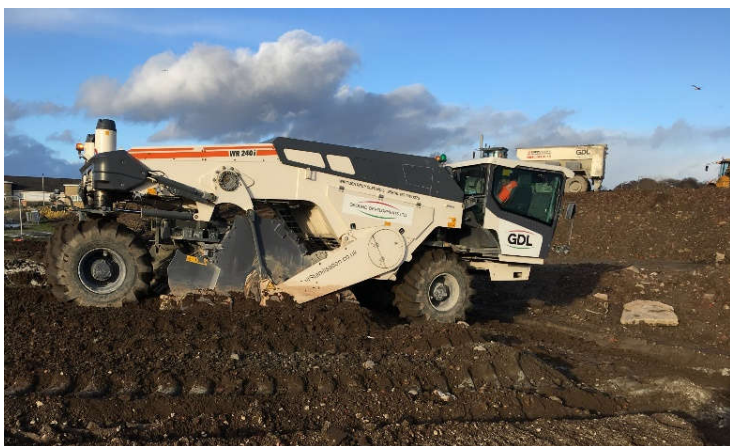

Enabling works for the new community hub bringing together Carnbroe and Sikeside primary schools and nursery class.

Client: Morgan Sindall

Works Package: Bulk Earthworks, Soil Stabilisation & Remediation

Project Numbers:

- Topsoil - 6,708m³
- Bulk Earthworks - 11,135m³

Challenges & GDL Solutions

- Tight timescale
 - Agreed phased handover
- Remediation Strategy
 - Provided the required clean capping using onsite materials through efficient earthworks management.
- Close proximity to water course
 - Robust Pollution Prevention Plan

Client Benefits

- Early handover of the building area assisted our client in meeting their tight programme.
- Sustainable material handling practices implemented across the project.
- Reduced export and import requirements, delivering cost savings, minimising local community disruption, and lowering the project's carbon footprint.
