

Case Study

New Primary School and Nursery Riverside Community Hub

Project Description:

Enabling works for the new community hub bringing together Carnbroe and Sikeside primary schools and nursery class.

Key Works: Bulk Earthworks
Soil Stabilisation
Remediation

Client: Morgan Sindall

Date / Duration: January 2022 / 17 wks

Topsoil Volume: 6,708m³

Cut / Fill Volume: 11,135m³

Project Challenges / GDL Solutions:

- Tight timescale / phased handover.
- Robust Pollution Prevention Plan due to close proximity to watercourse.

Project Benefits for Client:

- Reduction in export / import requirements provided financial savings as well as minimising disruption to the local community and reducing the carbon footprint of the contract.
