

### **Project Description**

Enabling works for the new Paisley Grammar School Community Campus.

Client: Morrison Construction

Works Package: Bulk Earthworks, Soil Modification, Remediation

Project Numbers:

- Bulk Earthworks – 32,936m<sup>3</sup> (incl 17,378m<sup>3</sup> over excavation)
- Soil Modification – 32,936m<sup>3</sup>

### **Challenges & GDL Solutions**

- Our client was working to a very tight programme
  - Working efficiently and in line with our own programme allowed handover on time
- Contamination hotspots and buried obstructions were present on site
  - By over excavating the building area to provide a foundation solution in lieu of deep trench fill or piling the contamination and obstructions were dealt with as encountered

### **Client Benefits**

- Reduction in export / import provided financial savings, minimum disruption to the local community & reduction of contract carbon footprint.
- Simplified foundation solution provided cost certainty.
